

Unified Meeting[®]

User Guide

v4.11.7

Unified Meeting lets you quickly and easily bring people together—from anywhere in the world—so they can see what you want to show them, hear what you have to say and interact in order to learn, collaborate and make decisions. You get audio, web and video conferencing in a single, proprietary system that integrates with everyday business tools, like calendaring systems and instant messaging clients, so starting and joining meetings is done just with a click of the mouse. The best part is that all of this comes as a service that is managed for you.

Reliable and secure, Unified Meetings allows you to present PowerPoint[®] slides, share applications, quiz and survey participants and show web sites—all with the same impact and results as in-person meetings. So you meet more productively and more often without the time and expense of travel.

Use Unified Meeting for:

- + Sales presentations
- + Training and e-learning programs
- + Marketing seminars
- + Product launches
- + Departmental meetings
- + Company announcements
- + Collaboration and project management

Tips for a Successful Conference

Below are some helpful hints for conducting an efficient and productive Unified Meeting.

- + Prepare in advance. To avoid meeting delays, take time before the conference to create and upload any resources you'll need for your meeting, such as presentations, surveys or quizzes.
- + Enter the meeting early to ensure participants can access your meeting at the scheduled start time. Give yourself a few minutes to open the meeting room and make sure all necessary system components are loaded.
- + When speaking, talk directly into either a headset or telephone receiver for optimal clarity.
- + Mute all participants in non-collaborative meetings to minimize background noise.
- + Be conscious of participant connection speeds, as they may vary. Allow time for transition between slides.
- + For optimal application sharing performance, keep the number of open windows to a minimum.
- + Use annotation tools and include polling and quizzes to promote interactivity.
- + To help participants better understand and recall content, limit presentation materials to six or seven lines per slide. Use larger-sized fonts for legibility.
- + Be sure participants download the Unified Meeting application prior to your meeting if they wish to use certain features such as presenter capabilities, desktop video and desktop VoIP.

Note: Your participants are not required to download the application to join your meeting.
